

CARING TOGETHER: SESSION 6

Infection Prevention and Control Resource for Group Homes and Community Living Settings

This workshop will introduce a new resource that has been developed by a team that includes Richmond community living care providers, Health Services for Community Living, Community Care Facilities Licensing, and Environmental Health staff.

Please join us for an afternoon focused on infection control practices suitable for small community programs. The workshop is suitable for any staff member who provides care for individuals with developmental disabilities or other health care needs. The workshop will also be of interest for those persons responsible for developing care policies and procedures regarding infection prevention and control.

Thursday, September 16, 2010
1:00 pm – 4:00 pm
